

## Managing onboarding and signup

FUSE is a low-code platform that contains pre-configured business templates to accelerate process customization and pre-built analytics to facilitate insightful analysis.

To onboard new user on Fuse, copy the user onboarding URL- <https://fuse.masterdataonline.com/ngx-auth/en/index.html#/auth/get-started> in your browser.

Enter the email address of the user you want to onboard.

An email will be sent to the user to confirm the account. As soon as the user clicks on the confirm account, they will be redirected to the signup page.

- Enter the first name (ex- James)
- Enter the last name(ex-Smith)
- Enter the email address. ( [abc@xyz.com](mailto:abc@xyz.com))
- Enter the password. ( set a strong password)
- Select the region. ( region will be the server region)
- Select the company name. (ex- App Tech)
- Select the industry (enter the industry name)
- Once done, click on the signup button.

Once the user signup, they will be redirected to the Fuse home page.

- Click on the “My Profile” icon.
- Click on the sign out option to sign out
